

List of Medical Institutions which Offer Support in English in Katsushika

※This list was created based on information tabulated in January 2020.

○Medical care type

Type A: There are medical professionals, staff or (medical) interpreters who can communicate in English on hand.

Type B: It is possible accept patients who require English support through interpretation over the phone or through video or multi-language tools such as tablets.

Type C: There is no English support system but support is possible by making prior arrangements such as dispatching interpreters so prior consultation before receiving medical care is necessary.
